

# 2000 Michigan Traffic Crash FACT SHEET

In a crash, motorcyclists lack the protection of an enclosed vehicle.

The 2000 death rate for motorcyclists was 14.7 per 100 million vehicle miles traveled compared to the overall mileage death rate of 1.5 per 100 million vehicle miles traveled.

Injuries to motorcyclists were proportionately more severe than injuries to persons in other motor vehicles.

There were 3,180 motorcycle-involved crashes in which 78 motorcyclists were killed and 2,541 injured.

Motorcycles were involved in 0.75 percent of all traffic crashes in Michigan in 2000.

Because motorcycles have a low profile, they tend to be less visible than other motor vehicles. 57 (73.1%) of the 78 motorcyclists killed were reported by police as "going straight ahead" just prior to crash.

Of the motorcyclists killed in traffic crashes in 2000, 89.7 percent were male.

Of the motorcyclists killed in 2000, 26 deaths were the result of a had been drinking crash and 23 (88.5%) of these motorcyclists had been drinking.

Of the male motorcyclists injured, 506 (23.5%) were 25 - 34 years old.

AGE OF MALE MOTORCYCLISTS KILLED & INJURED IN MOTOR VEHICLE CRASHES
