

10 YEAR

Deaths in alcohol-related crashes decreased 34.3 percent over the last ten years.

Mirroring the trend in deaths, HBD injuries have decreased over the last ten years. In 2007, there were 6,563 injuries in crashes where the operator had been drinking (HBD), down 48.6 percent from 1998.

Alcohol involvement in fatal crashes has also decreased over the ten-year period. In 2007, there were 313 HBD fatal crashes where the operator had been drinking (HBD), down 34.2 percent from 1998.
