		A	B	C	
Worn	0	1	1	2	1
Not Worn	0	4	9	6	3
Unknown	0	2	13	9	4
Total	0	7	23	17	8

The National Center for Statistics and Analysis of the National Highway Traffic Safety Administration cites a study by the Centers for Disease Control [4]: "Bicycle helmets are 85 to 88 percent effective in mitigating head and brain injuries in all types of bicycle accidents, making the use of helmets the **single most effective countermeasure** available to reduce head injuries and fatalities resulting from bicycle crashes."
